# LASERABLE One-Touch Photo/Photograv™

**Photograv™ 3.0** — The Power Tool for Laser Engraving Photographs

*PhotoGraV has been designed specifically for Laser Engravers*

**Powerful tools** that have been found effective in processing photos for laser engraving.

**Automated application** of these tools to the subject photo.

**Simulation** of the engraving process for common materials so the "engraved product" can be inspected before it is actually engraved.

**Interactive process** with adjustable enhancements and real-time visual feedback.

**Reports** and colour proofs for customer approval and reference.

**User defined** parameter sets can be saved for further customization.

**Calibrated** to most laser engraving equipment and common materials.

LAS-PHOTO PhotoGraV™ 3.0  
Software for Laser Engraving  
(includes Manual and CD)

**PhotoGraV** simulates more than 20 engraving materials including: cherry and walnut wood; clear and black-painted acrylic; black laser brass and anodized aluminum; a variety of generic leather materials; and many plastics with either a white or black core and with a variety of caps including brushed gold and most solid colours.

**PhotoGraV** is very easy to use:  
1. Select the image you want to engrave.  
2. Select the engraving material.  
3. Choose the Auto Processing option.

*Now you can engrave photographs with ease!*

## Make Your Mark...

on the most innovative markable aluminum in the industry. For the first time, you can achieve rich black positive graphics when marking metal. With AlumaMark™ laser markable aluminum:

- the best resolution capability of any markable metal
- excellent durability with resistance to chemicals, heat, abrasion, and sunlight
- consistent, reliable one-step marking, without chemicals or fill
- the ability to create smooth-surface graphics, integrated into the aluminum, using very low power settings

## How to use AlumaMark™

- Works well with most CO<sub>2</sub> lasers and some low power YAG lasers.
- AlumaMark aluminum sheets are **markable on one side only** (peel off protective plastic before lasering)
- Satin silver uses less power than the other finishes.

# LASERABLE Metal Marking Compound

CerMark laser marking materials combined with the power and speed of lasers provide high contrast, permanent marks on a variety of substrates. Our products are lead and cadmium-free, water-based materials which means they are environmentally preferred and easy to clean up.

CER-CAN is available in aerosol cans. Yields 1,100 sq. in.

CER-000 can be applied by brushing.

Take care to apply an even coat, avoiding brush marks.

CER-050 can be applied using conventional spray techniques, spray guns or artist's airbrush. Can yield up to 2,000 sq. in.

Application of CER-050 with an airbrush.

Cerdec can be removed with plain water.

- CER-000 - Metal Marking Material, 1 oz.
- CER-050 - Metal Marking Material, 1/2 lb.
- CER-CAN - Metal Marking Material, Spray Can 12 oz.
- CER-X-000 - Hi-Stick Metal Marking Material, 1 oz.
- CER-X-050 - Hi-Stick Metal Marking Material, 1/2 lb.
- CER-TP1 - Cerdec Tape, 1" x 50 ft. roll

*High contrast, permanent marks on uncoated metal or glass.*

## Application

Mark quality depends on a variety of factors including the substrate used, marking speed, dot size, overlap, material thickness and laser parameters. Materials may be applied by various methods, including a brush-on technique, spraying, screen printing, roll coating, tape and others.

## LaserTape® Sandblastable Laser Mask

Photo  
SYSTEMS Brasive®

### Apply — Laser — Blast!

apply

laser

blast

PhotoBrasive® LaserTape® is a sandblastable laser mask designed to create stencils for the high end corporate, promotional products and giftware industries. Simply Apply-Laser-Blast!

LaserTape® allows you to use a laser engraver machine in correlation with a sandblast machine to create low-cost stencils. LaserTape® conforms beautifully to surfaces without wrinkling, burns clean and peels easily making for an effortless removal.

**How it works** Begin by applying LaserTape® sandblastable laser mask to substrate with a squeegee removing air bubbles and wrinkles. After removing the polyester carrier, laser through LaserTape® to create your sandblastable mask. Finally, sandblast your substrate to required depth and colour fill if desired.

- NO PVC!
- Easy to colourfill after sandblasting
- Fast & simple clean up - Peels off easily
- Conforms smoothly to surfaces without wrinkling
- Quick burn
- Available in 4 mil

## MultiMat™

We would like to introduce our new *Multi-Mat Plus* single-sided - hold down mat.

*Multi-Mat Plus* is developed specifically for laser engraving.

*Multi-Mat Plus* with improved adhesion is much stronger and now in a new colour (brown).

Single-sided coating of *Multi-Mat Plus* is for better movement of the mat on the table.

Sometimes it is necessary to affix the mat to the Engraving Table.

Use our Engraving Table Tape for this. (Part No. 99E-050 (1/2") or 99E-075 (3/4"))

If you engrave thin laser materials or laser foils, sometimes these materials will not stay absolutely flat. This always causes focus problems!

#### AVAILABLE SIZES:

TKML-122	12" x 12", 1 sided
TKML-124	12" x 24", 1 sided
TKM2-122	12" x 12", 2 sided
TKM2-124	12" x 24", 2 sided

With *Multi-Mat Plus* you can work with much more precision.

Simply press the material on the mat and you will always get the best results.

# LASERABLE Medallions & Laser LIGHTS

## LaserLIGHTS

LaserLIGHTS® are especially designed for laser engravers. Completely flexible and extremely durable, with excellent exterior properties including resistance to water, solvents, abrasion, and extreme temperatures.

**STEP 1**

LaserLIGHTS in laser bed with MultiMat™ (helps to hold material flat - keeps surface at focus height on laser bed)

**STEP 2**

Create template for disk inserts

**STEP 3**

Laser engraves and cuts material

**STEP 4**

Remove disk insert

**STEP 5**

Affix adhesive backed material to medallion
